

I asked this page to be a home page  
With general information about the  
industry and link for logging in for the  
accessor and the professional a Quick Verify  
button and a search button

I don't think the More information button is  
necessary

**Quick verify**  
I think this should be on the landing page

**Reporting**  
Nothing happens here, Please explain  
What one will get from this tab.
