

Professional Account Feedback

1. Search on the tabs MUST Be called Quick Verify
2. The Request Verification button on the Add Business profile is not working. I filled the form and clicked on the button but nothing happened
3. ePlan filling when I fill the form and click verification It shows Something went wrong but when you click on archive you discover the form submitted successfully
4. Now the form is meant to be downloaded, but when you click on download it shows an error message It says cannot be opened
5. Search which must be changed to Quick Verify does not work at all ..

Accessors Account Feedback

1. Account creation was successful but please can't the app redirect to log in page after a successful registration? Because it just says account creation successful.. and some user maybe confused on what next to do
2. I upload an avatar, it shows the photo and suddenly it no longer shows
3. I already signed up as a professional and entered my profile and even projects and I thought I would see that as an Unverified Professional ..but it didn't appear there... My account was not shown on the database of unverified professional

NB

But please check the professional side on a real device , create an account and add Business profile and see the app behaviour...check the user experience yourself...
